OBJECTIVE

I want to work in a place where I can make an impact, create great applications, feel proud of my work and my place and release my full potential instead of doing regular 9 to 5 job and finish my day without feeling existed about my work.

EDUCATION

I was studying communication and electronics engineering(third year) at faculty of engineering Helwan University from 2014 until 2020 then some family circumstances happened to me which forced me to take a break from college.

SKILLS

- Great Skills in Front-End developer with HTML,CSS and JS
- Good skills in CSS frameworks like **Tailwind CSS** and **Bootstrap**
- Good Knowledge with **JavaScript**
- Have a very good skills in **React JS** (Java script front-end **library**)
- Good Knowledge with **Node Js** and **Express Js** Backend **Framework**
- Good in MERN Stack Technology (Mongo DB, Express JS, React JS , Node JS)
- Have a Good experience in **Linux Os** (Kali distribution in particular)
- I can work with **Git** and **Github** to push my code
- I have my own website made with React on which you can find my skills, links to my social accounts(including **Github** and **Codepen**) and a list of previous projects

EXPERIENCE

- IT Help Desk At Al-Aqeed Ezzat Gohar School (2020-2021)

ACTIVITIES

- IT member at Dimensions Egypt Student Organization (2018 – 2019) participating in Cairo Maker Hackathon Event for two weeks at Nile University
- IT Department Head (Leader) at Dimensions Egypt Student Organization (2019 - 2020) my jobs was teaching web design and web development , give a tasks on the sessions and then review the tasks
